PROFESSIONAL EXPERIENCE

Public Storage Corporation | Glendale, CA *Dec 2025 – Feb 2026*

IT Auditor

- Led IT audit covering SAP S/4HANA, AWS infrastructure, and facility access systems for a publicly traded REIT with a large national property portfolio.
- Closed SOX testing ahead of schedule with no remediation items raised by external auditors.
- Identified gaps in AWS IAM configurations and privileged access; coordinated with IT to remediate before year-end close.
- Tested ITGCs and ITACs across change management, logical access, and batch job scheduling in SAP and AWS.
- Ran walkthroughs with control owners across IT, DevOps, and Security teams; cut evidence collection turnaround.
- Presented findings to the CFO and Audit Committee on a quarterly basis.
- Helped close prior-year findings, contributing to a clean SOX opinion (first in several years).

Investar Bank | New Orleans, LA *Jul 2025 – Aug 2025*

Senior Internal Auditor

- IT and operational audits at a regional bank, focused on core banking system controls and cybersecurity.
- Tested SOX key controls, documented walkthroughs, and validated operating effectiveness with no deficiencies noted.
- Updated the IT risk assessment through interviews with department heads; flagged emerging risks in digital banking channels.
- Tested Active Directory access reviews, ServiceNow change tickets, and incident response procedures for FFIEC compliance.
- Drafted audit reports reviewed by the Chief Audit Executive.
- Point of contact for Deloitte external auditors on PBC requests.
- Supported the BSA/AML audit; findings fed into updated transaction monitoring rules.

Ernst & Young LLP (Global Delivery Services) | Remote / India *Jun 2016 – Jul 2024*

Manager – Technology Risk

- Delivered IT SOX and SOC engagements for clients including Western Digital, Tenable, Bombardier, and CIBC.
- Built and led offshore audit teams across India and US time zones.

- Tested ITGCs across SAP, NetSuite, Salesforce, Workday, and Oracle; the team's go-to person on complex ERP configurations.
- Tested P2P, O2C, and R2R cycles end-to-end; identified segregation of duties conflicts that mitigated meaningful fraud exposure.
- Wrote Excel VBA scripts that automated user access testing, cutting testing time substantially and freeing the team for higher-risk work.
- Drafted SOC 1 and SOC 2 Type II reports across security, availability, and confidentiality trust principles.
- Presented findings to client CIOs and CFOs; scoped audits with IT directors to prioritize high-risk areas.
- Passed EY internal quality reviews with minimal comments across the engagement portfolio.
- Recognized with the EY Applause Award and a client-nominated On-Spot Award.

NTT Data | Gurugram, India *Oct 2013 – May 2016*

Associate Team Lead, Resource Management — Client: Blue Cross Blue Shield Vermont

- Managed staffing for a healthcare account; matched consultants to projects across Financial Services and Life Sciences practices.
- Built Excel dashboards to track utilization metrics; flagged underutilized resources weekly.
- Recovered unbilled hours by auditing timesheets and fixing billing system leakage.
- Presented quarterly metrics to VP-level leadership; insights drove restructuring of an underperforming practice area.

UnitedHealth Group (Global Service Division) | India *Jun 2008 – Sep 2012*

Quality Auditor – Senior Associate — Client: PBH / UMR

- Performed system configuration audits in the Facets healthcare platform for member, group, provider, and facility setup.
- Conducted UAT and functional testing for Facets upgrades and 5010 compliance implementation.
- Reviewed EDI transactions and auto-adjudication reports to surface processing errors. Coordinated benefits across Medicare, Medicaid, and commercial payers (Aetna, Cigna).
- Built Excel VBA macros and Macro Express automations to cut processing time. Six Sigma Yellow Belt; participated in Green Belt projects.

Career break: Family caregiving (Aug 2024 – Jun 2025). Stayed current through certifications and coursework; returned to work July 2025.

PROJECTS

Agentic AI for ITGC and SOX Audit Automation *(in progress)*

- Building a prototype that uses AI agents to handle parts of ITGC and SOX testing, including evidence collection, control mapping, and exception flagging.
- Iterating against sample audit data across change management and logical access domains; designed around real audit workflows so documentation standards stay intact for external auditors.
- Exploring integration with audit workpaper formats and ERP environments such as SAP and Oracle.

EDUCATION

Bachelor of Commerce, Vinoba Bhave University, India — 2008. **Work authorization:** US EAD; no sponsorship required.
